Open to remote roles worldwide · Willing to relocate

PROFESSIONAL SUMMARY

AI-focused Software Engineer who **ships production AI products**, not just demos. Built and deployed multiple live AI SaaS applications using large language models / LLMs (Claude, Groq Llama-3, Gemini, OpenAI), real-time voice pipelines (Twilio, Deepgram, ElevenLabs), agentic automation (n8n, MCP), and computer vision (YOLOv8, TensorFlow.js). Strong full-stack foundation in Next.js, ASP.NET Core, Node.js, FastAPI and SQL. Certified in AI by Anthropic and Google. Native Arabic speaker who builds Arabic-language AI for the MENA market. Seeking an applied-AI / LLM engineering role where strong engineering fundamentals meet hands-on AI delivery.

TECHNICAL SKILLS

AI / LLM: Large Language Model (LLM) application development, Retrieval-Augmented Generation (RAG), prompt engineering, agentic pipelines, function calling, evaluation · Claude (Anthropic), Groq Llama-3.3-70B, Gemini 2.0 Flash, OpenAI GPT & Realtime · Model Context Protocol (MCP) · n8n

Voice / Real-time AI: Twilio (Programmable Voice, MediaStreams), Deepgram STT, ElevenLabs TTS, WebSockets, low-latency streaming

Computer Vision: TensorFlow.js, YOLOv8, real-time inference pipelines

Backend: ASP.NET Core, Node.js, FastAPI, RESTful APIs, WebSockets

Frontend: Next.js 14/16, TypeScript, React, Tailwind CSS, Recharts

Databases: PostgreSQL, Supabase (pgvector), SQL Server, MySQL, Oracle, Prisma ORM, Drizzle ORM

DevOps / Cloud: Vercel, Fly.io, Railway, Docker, GitHub Actions, CI/CD

Languages: C#, TypeScript, JavaScript, Python, Java, SQL

Soft skills: Leadership, Agile/Scrum, problem solving, technical communication

SELECTED AI PROJECTS

Sawt — Arabic AI Voice-Agent SaaS for MENA
Next.js 16 · FastAPI · Supabase (pgvector) · Twilio · OpenAI Realtime · Deepgram · ElevenLabs · Fly.io — ai-voice-agent-five-kappa.vercel.app

- Production, multi-tenant SaaS where AI voice agents answer and place calls in Arabic dialects (Levantine, Khaleeji, Egyptian, MSA) for bookings, orders, and 24/7 support.
- Engineered the real-time pipeline (Twilio to Deepgram STT to function-calling LLM to ElevenLabs TTS), cutting cost per call-minute ~57% vs the OpenAI Realtime API while keeping latency low.
- Shipped 14+ agent tools/integrations (calendars, CRM, WhatsApp, Stripe), a RAG knowledge base, org & role-based access control, usage-based billing (Paddle/HyperPay), and CI/CD.

OmniAgent — Omnichannel AI SaaS Platform
Next.js 14 · TypeScript · Supabase · Prisma · Groq Llama-3.3-70B · Gemini 2.0 Flash · n8n — omnichannel-saas-zeta.vercel.app

- Production omnichannel AI SaaS (65+ deployments) routing conversations through an LLM agent with Gemini fallback.
- Implemented real-time conversation handling, multi-tenant architecture, and n8n workflow orchestration.

WorkForce AI — Real-Time Workplace Monitoring
TypeScript · TensorFlow.js · YOLOv8 · MJPEG streaming · Drizzle ORM · Railway

- Computer-vision platform tracking attendance and productivity from live camera feeds.
- WebSocket dashboard with live alerting; optimised frame pipeline for low-latency inference.

LeadGrade — AI Lead-Scoring SaaS
Next.js 14 · TypeScript · Gemini API · Supabase · Recharts — lead-scoring-rho.vercel.app

- Lead-scoring engine running compliance hard-stops (TCPA, FTC TSR) then scoring 0–100 via Gemini semantic analysis.
- Role-based dashboards, source analytics, white-label config; fully deployed on Vercel.

SiyanahJo — Smart Vehicle-Maintenance Platform (Graduation Project)
ASP.NET Core · SQL Server · Flutter

- Full-stack web + mobile platform connecting car owners with vetted maintenance workshops — built to digitize a fragmented, low-transparency sector in Jordan (Software Engineering capstone, team of 4).
- Implemented appointment booking for routine and emergency maintenance with workshop selection, plus a vehicle pickup-and-delivery flow (collected from the customer and returned after service).
- Built real-time, stage-by-stage maintenance tracking for transparent visibility, and a ratings & reviews system with workshop quality oversight to build trust between owners and workshops.

PROFESSIONAL EXPERIENCE

Software Engineering Intern — Orange Digital Center (Orange Jordan)
March 2025 – June 2025 · Amman, Jordan

- Built my Software Engineering graduation project (SiyanahJo) on-site at Orange Digital Center — Orange Jordan's coding & innovation hub — using its workspace, resources, and mentorship.
- Consulted directly with Orange specialists and engineers to refine the project's design and implementation (ASP.NET Core, SQL Server) and deepen my industry knowledge.

.NET Developer Intern — Future Advanced Internet Solutions
September 2024 – December 2024 · Amman, Jordan

- Contributed to building a mobile app and website for Caesar Pizza (a fast-food chain in Jordan) as part of the development team.
- Worked with ASP.NET Core / C# to develop application features and support testing and bug fixes within an Agile workflow.

Full-Stack Development Trainee — SHAI for AI
May 2022 – September 2022 · Amman, Jordan

- Completed a 90-hour full-stack development training program (Webtoon Club for Web Tech & SHAI for AI), building web applications with React, JavaScript, and Node.js.
- Strengthened core front-end and full-stack engineering fundamentals through hands-on, project-based learning.

CERTIFICATIONS

- Model Context Protocol: Advanced Topics — Anthropic (2026)
- Claude with Amazon Bedrock — Anthropic (2026)
- Claude with Google Cloud Vertex AI — Anthropic (2026)
- AI Capabilities and Limitations — Anthropic (2026)
- Google AI Essentials — Google (2026) · Google Prompting Essentials — Google (2026) · AI for App Building — Google / Coursera (2026)

EDUCATION

B.Sc. Software Engineering — Al-Zaytoonah University of Jordan · *Oct 2021 – Jul 2025 · Amman, Jordan*

LEADERSHIP

Event Operations & Technical Admin (with Zain Jordan) — Ran technical operations for a 400+ participant esports event (Discord, Warlegend.gg, live production); enforced fair play and supported streaming teams during live finals.
